CoolPeel™ - CO₂ but Cooler

CoolPeel™ uses the latest CO₂ laser technology to target fine lines, sun damage and uneven skin texture. This non-invasive treatment gently removes damaged skin while stimulating collagen production for visibly clearer, healthier-looking skin.

- Advanced skin rejuvenation for all skin tones
- Fast treatments with minimal discomfort
- Minimal recovery time, perfect for those on the go
- Chosen by thousands of clinics worldwide

FAQ's

Q: What is CoolPeel™?

A: CoolPeel™ is an advanced CO₂ laser treatment that resurfaces skin with minimal downtime. It gently removes the superficial skin layer, revealing younger-looking skin, perfect for clients seeking quick rejuvenation.

Q: How does CoolPeel™ work?

A: CoolPeel™ uses the precision of the SmartXide Punto CO₂ laser to deliver high-energy pulses in a short time. This treats the superficial skin without excess heat, reducing discomfort and speeding up recovery.

Q: What does a CoolPeel™ treatment feel like?

A: Clients typically feel mild tingling or stinging during treatment. The SmartXide Punto is gentle enough that most clients do not need a topical anaesthetic.

Q: Is there downtime after CoolPeel™?

A: Downtime is minimal. You may experience slight redness for a day or two, similar to sunburn. Your skin may feel dry as it heals, so keep it moisturised.

Q: How soon will I see results from CoolPeel™?

A: You'll see initial improvements within a few days as damaged skin is removed. Over the next few months, collagen production will enhance your skin's texture and appearance.
